PHOTOVOLTAIC MODULES

Series	BIPV-COLORED-PLASTERED	Reference	BIPV-CL-PL-02-M158-60	Type	MONOCRYSTALLINE

INTRODUCTION

MATERIALS
Solar Innova uses the latest materials to manufacture photovoltaic modules.

USE
Our modules are ideal for any application that uses the photoelectric effect as a clean energy source because of its minimal chemical pollution and no noise pollution.

FRONT
The front of the module contains a tempered solar glass with:
- High transmissivity.
- Low reflectivity.
- Low iron content.

PV CELLS
These PV modules use high-efficiency monocrystalline silicon cells (the cells are made of a single crystal of high purity silicon) to transform the energy of sunlight into electric energy.

Each cell is electrically rated to optimize the behavior of the module.

Its performance is excellent over the entire range of light spectrum, with particularly high yields in low light situations or cloudiness to direct sunlight (diffuse radiation).

ENCAPSULANT
The cell circuit is laminated using as encapsulant:
- PVB (Polivinil Butiral).

BACK
The rear of the module contains a tempered glass which provides complete protection and seals against environmental agents and electrical insulation.

JUNCTION BOX
The junction boxes with IP67, are made from high temperature resistant plastics and containing terminals, connection terminals and protection diodes (by-pass).

These modules are supplied with symmetric lengths of cable, with a diameter of copper section of 4 mm and an extremely low contact resistance, all designed to achieve the minimum voltage drop losses.

PERFORMANCE
Our modules comply with all safety requirements not only flexibility but also double insulation and high resistance to UV rays, all are suitable for use in outdoor applications. The design of these modules makes their integration in both industrial and residential buildings (one of the most emerging sectors in the photovoltaic market), and other infrastructure, simple and aesthetic.

QUALITY CONTROL
We have quality control divided into three elements:
- Regular inspections allow us to guarantee the quality of the raw material.
- Quality control in the process of our manufacturing procedures.
- Quality control of finished products, we conduct through inspections and tests of reliability and performance.

WARRANTIES
Our manufacturing plants have been prepared in accordance with:
- ISO 9001, in terms of Quality Systems and Business.
- ISO 14001, in terms of Environmental Management Systems.
- ISO 45001, in terms of Management Systems Health and Safety.

CERTIFICATES
Our PV modules are certified by internationally recognized laboratories and are proof of our strict adherence to international safety standards, long term performance and overall quality of products.

DESCRIPTION

Silicon cell photovoltaic solar module sc-Si, BIPV-Colored-Plastered series, for architectural integration, from the manufacturer SOLAR INNOVA, maximum power (Wp) 162 W, voltage at maximum power (Vmp) 34,44 V, current at maximum power (Imp) 4,73 A, open-circuit voltage (Voc) 40,64 V, short-circuit current (Isc) 5,01 A, efficiency 9,12 %, composed of 60 cells, front layer tempered glass thick 4 mm, encapsulant layers of cells of PVB, back layer of tempered glass thick 4 mm, junction box (diodes, cables 4 mm2, 900 mm and connectors MC4-T4), working temperature - 40 / + 85 ºC, dimensions 1050 x 1700 x 10,23 mm, maximum wind load 2400 Pa, maximum snow load 5400 Pa, weight 40,74 kg.
